**SUBJ: REMOVAL OF CONTAMINATED SOIL AT SITE 7175, MCCOY
ANNEX, NAVAL TRAINING CENTER ORLANDO, FL**

Ref: (a) FDEP LTR dated 21 September 1995
(b) Phone conversation between Nick Ugolini and John Mitchell dtd
10/2/95

Dear Mr. Mitchell,

After reviewing reference (a), a response to your concerns is certainly warranted. A modification to the Alternative Procedure Order between the state of Florida and the U.S. Navy has been requested and granted. This agreement allows the Navy to exceed the 1500 cu yard contaminated soil removal limit at an individual site. ABB Orlando will send you a copy of FDEP's approval letter. ABB has been tasked to review the target cleanup level and the amount of soil to be removed to ensure the accuracy of the calculation.

In reference (b), Mr. Nick Ugolini discussed the reduced funding levels which has now been imposed on all Navy environmental work. The primary driver for funding work at NTC Orlando is the reuse of the site. Site 7175 does not have a high reuse priority and will most likely be delayed until the final year of the NTC Orlando's closure schedule.

Thank you for your interest in this project. If you have any questions please contact Mr. Nick Ugolini at (803) 743-0596.

Sincerely,

A handwritten signature in cursive script, appearing to read "H. J. Fraser-Rahim".

H. J. FRASER-RAHIM, P.E.
